Career Objective

A highly motivated and detail-oriented medical lab science undergraduate seeking a for an attachment position in your medical facility. Possessing strong research and innovation skills, collaboration skills and communication skills who is ready to work and learn in your facility.

Education

Kisii university

Bachelor of Science in Medical lab science

Expected Graduation Year 2026, December

Relevant Coursework:

Medical Virology, Histology

Medical Bacteriology, Clinical chemistry

Medical Phlebotomy, Medical Biostatistics

Medical mycology, Research Methodology

Basic and advanced Hematology, Biochemistry

Blood transfusion, Entomology

Forensic science, medical biotechnology, Nutrition

Epidemiology and human service Management

Human anatomy and physiology, medical parasitology among others

Skills & Competencies

Proficient in laboratory techniques such as (phlebotomy, sample preparation, Microscopy, centrifugation and staining)

Knowledgeable in diagnostic equipment operation and maintenance.

Familiar with quality control procedures and infection prevention protocols.

Competent in laboratory systems and data recording.

Expert in Microsoft Word, Excel, Access, PowerPoint and Python
Data analysis and interpretation

Proficiency in R, Python, SPSS, and STATA

Machine learning fundamentals

AI and machine learning development

AI training and monitoring

Strong problem-solving and critical-thinking skills

Collaboration skills and working under team work.

Research and Innovation skills.

Proficiency in Matlab

Projects & Research

I have been conducting several researches which are now awaiting publications although am working with my lecturers and my colleagues from our school research club which comprises of students from all faculties in school of medicine.

Innovations: I have 3 innovations, 2 in cancer under oncology department and 1 in phlebotomy under blood drawing system and IV-line infusion system. Which I was able I have been presenting in some conferences waiting for grants. Last time I was able to present under western Research and innovation conferences which was conducted in Kisii, Before Presenting it on Nyanza research and Innovation Association.

Winner under revolutionizing healthcare in western Research and innovation conferences 2026

Currently working on AI in Breast Cancer and Cervical Cancer

Certifications & Training

Research and innovation training.

Attending Western Research and innovation conference.

Antimicrobial resistance team.

Research Training

First and aid training

Introduction to python.

Python in data analysis

Ai and Machine learning

Clinical research

Economics

Practical Experience

Attachment 1: Othaya sub county Level IV Hospital

I was able to appreciate different diagnostic techniques as from 5th may 2024 to 7th August 2024.

Attachment 2: Mbagathi Hospital

Was able to appreciate well advanced diagnostic techniques, gave me an opportunity to develop my research skills, was able to work as a research assistant.

Extracurricular Activities & Leadership

Member, Kisii Medical lab science family

Member, Kisii University Medical Research club

Participant, Hackathons or Data Science Competitions
